

Software Engineering – 22AIE311

Project Title: Amrita Community Forum

TEAM No: 14

Team Members : Manoj Srivatsav P , Saran J Palani, Chandrakiran, Dewang Choudhary

Sprint 1 : Foundation & User Management

- Manage the header functions
- Login Management
- Profile Management
- Skill Tag Management
- Task Listing Management
- Browse & Discovery Management
- Tech News Feed Management

Upon clicking the Login button or any action requiring authentication:

- Open the login/register page
- Enable logging in (user-id, password)
- Upon successful login, redirect to intended dashboard
- Upon failure, redirect to exception handling (retry or forgot password)
- On registration, allow users to select skill tags
- Initialize user reputation score after registration

Upon clicking Profile Management:

- Display personal information (name, email, bio, skills)
- Allow editing profile details

- Display reputation score and analytics summary
- Show total tasks completed, average rating, dispute rate, and skill-wise performance
- Save and confirm profile updates

Upon clicking My Tasks (Task Creator Side):

- Display all tasks categorized as Open, In Negotiation, In Progress, Completed, Disputed
- Allow creating a new task with title, description, tech stack, difficulty, budget, and deadline
- Allow editing or deleting tasks that are still Open
- Display applications received for each task

Upon clicking Browse Tasks (Solver Side):

- Display available Open tasks
- Allow filtering by skill tag, difficulty, and budget
- Show full task details upon selection
- Allow applying with proposal submission

Upon clicking Tech News:

- Display latest technology-related posts categorized by domain
- Show trending discussions
- Allow filtering by category

Sprint 2 : Task Lifecycle & Real-Time Negotiation

- Manage Task Assignment
- Real-Time Chat Integration
- Task Status Transitions
- Submission & Verification
- Rating & Feedback System

Upon selecting an applicant:

- Change task status to In Negotiation

- Automatically create a dedicated chat room linked to task ID
- Notify selected applicant

Upon entering the Task Chat Room:

- Enable real-time messaging
- Show typing indicators and read receipts
- Allow file attachments and threaded replies
- Store all chat logs linked to task

Upon confirming negotiation:

- Change task status to In Progress
- Lock further applications

Upon clicking Submit Deliverables:

- Allow file upload and completion notes
- Change task status to Under Review
- Notify task creator

Upon clicking Approve Completion:

- Change task status to Completed
- Enable rating submission
- Trigger reputation recalculation

Upon clicking Raise Dispute:

- Change task status to Disputed
- Notify Admin
- Freeze reputation update until resolution

Sprint 3 : Reputation, Analytics & Community System

- Reputation Calculation Engine

- Analytics Dashboard
- Community Post Management
- Comment & Thread System
- Upvote/Downvote System

Upon completing a task:

- Calculate updated reputation score using weighted formula
- Update skill-wise statistics and completion rate
- Update dispute ratio

Upon clicking View Profile:

- Display total tasks completed, average rating, completion rate, dispute rate
- Display skill breakdown performance
- Display posts created, comments contributed, and upvotes received
- Display reputation score prominently

Upon clicking Create Post:

- Allow entering title and content
- Allow selecting category
- Publish post to news feed

Upon clicking Comment on Post:

- Allow adding comment
- Allow threaded replies
- Allow upvoting/downvoting comments
- Admin Monitoring Dashboard
- Dispute Resolution
- Content Moderation
- System Logs & Analytics

Upon clicking Admin Panel (Admin Only):

- Display user list with options to flag or suspend accounts
- Display full task overview
- Display dispute log and resolve disputes
- Display community posts overview
- Delete inappropriate posts or comments
- Display system activity logs

System-Level Automated Actions:

- Auto-update reputation after task completion
- Send notifications for task updates and discussions
- Archive closed tasks periodically
- Maintain analytics consistency
